

PRESS KIT

EDM PRODUCER & DJ

Every show my goal is to spread positive vibes and create unity with uplifting music so people create shared experiences across all ages and cultures.

Read the room, play for the crowd, keep them moving, and create special moments!

Jaycob Jaymes is an EDM producer & DJ crafting vocal-driven house music built on heavy bass, hypnotic synths, and melodic tension. Blending Bass House, Tech House, Melodic House, and Afro House, his productions fuse the grit and groove of Matroda and Max Styler with the emotional pull of Dom Dolla and John Summit, paired with the mainstream versatility of Diplo. His music is designed to create positive, high-energy moments with tracks people across all ages can connect to.

Known for his infectious stage presence, JJ takes crowds on a dynamic journey through original tracks, crowd-favorite EDM, and live remixes of throwback mainstream hip-hop, rock, and country layered over house music. Always reading the room and keeping energy high, his style translates seamlessly across all EDM settings: day or night, as an opener, peak-time, mainstage festival, underground, or at the afters. He is also the founder of Phat Basslines, an independent label pushing bold, bass-driven electronic music forward.

Bass House • Tech House • Techno • Bass
